

Nirma University

Institute of Technology

Semester End Examination (IR), December - 2025

M. Tech. in Computer Science and Engineering (Data Science), Semester-I
6CS303CC25- Statistics for Data Science

Roll /
Exam No.

25MC0005

Supervisor's initial
with date

AM 16/12

Time: 3 Hours

Max. Marks: 100

Instructions:

1. Attempt all questions.
2. Make assumptions about the data wherever necessary.
3. Draw neat sketches wherever required.
4. The use of a calculator is allowed.

SECTION - II

Q-1. Answer the following.

[18]

A. The nine measurements that follow are furnace temperatures recorded on successive batches in a semiconductor manufacturing process (units are): 953, 950, 948, 955, 951, 949, 957, 954, 955. (9)

CLO3,

BL2

(a) Calculate the sample mean, sample variance, and standard deviation.

(b) Find the median. How much could the largest temperature measurement increase without changing the median value?

(c) Construct a box plot of the data.

B. i) The standard deviation of the time you take for each statistics homework problem is 1.5 minutes, and it is 2 minutes for each chemistry problem. What is the standard deviation of the time you expect to spend on statistics and chemistry homework for the week if you have 5 statistics and 4 chemistry homework problems assigned? (9)

CLO1,

BL5

ii) A company has 5 Lincoln Town Cars in its fleet. Historical data show that annual maintenance cost for each car is on average \$2,154 with a standard deviation of \$132. What is the mean and the standard deviation of the total annual maintenance cost for this fleet?

Q-2. Answer the following.

[16]

A. What are mutually exclusive events and which are not please identify from the following with explanation and definition (4)

CLO1,

BL3

1. Student is member of football team and a basketball team

2. Student is a BBA student or a B tech student at Nirma University in the entry year 2016.

3. An applicant applying for BBA and B. Tech at Nirma University in year 2026

4. A citizen affiliating to a political ideology

B. Assume that in the detection of a digital signal the background noise follows a normal distribution with a mean of 0 volt and standard deviation of 0.45 volt. The system assumes a digital 1 has been transmitted when the voltage exceeds 0.9. What is the probability of detecting a digital 1 when none was sent? (6)

CLO1,

BL3

C.
CLO3,
BL5

In a class of 25 students, 24 of them took an exam in class and 1 student took a make-up exam the following day. The professor graded the first batch of 24 exams and found an average score of 74 points with a standard deviation of 8.9 points. The student who took the make-up the following day scored 64 points on the exam.

- (a) Does the new student's score increase or decrease the average score?
(b) Does the new student's score increase or decrease the standard deviation of the scores?

(6)

Q-3.

Answers the following.

[16]

A.
CLO-01

Three processes A, B and C are tested to see whether their outputs are equivalent. The following observations of outputs are made:

(8)

A	10	12	13	11	10	14	15	13
B	9	11	10	12	13			
C	11	10	15	14	12	13		

B.
CLO2,
BL3

Carry out the analysis of variance and state your conclusion. Researchers have conducted a survey of 1600 coffee drinkers, asking how much coffee they drink in order to confirm previous studies. Previous studies have indicated that 72% of Americans drink coffee. The results of previous studies (left) and the survey (right) are below. At $\alpha = 0.05$, is there enough evidence to conclude that the distributions are the same?

(8)

Response	% of Coffee Drinkers
2 cups per week	15%
1 cup per week	13%
1 cup per day	27%
2+ cups per day	45%

Response	Frequency
2 cups per week	206
1 cup per week	193
1 cup per day	462
2+ cups per day	739

Section-II

Q-4.

Answers the following.

[16]

A.
CLO2,
BL3

A survey asked the 850 respondents how comfortable they are with Facebook creating a list of categories for them. 41% of the respondents said they are comfortable. Do these data provide convincing evidence that the proportion of American Facebook users are comfortable with Facebook creating a list of interest categories for them is different than 50%?

(8)

B.
CLO1,
BL2

Define the following:

- Impact of choosing the significance level
- Number of samples and confidence interval
- Relation between Binomial Distribution and Normal Distribution
- Standard deviation of the distribution of the mean.

(8)

Q-5. Answer the following.**[18]****A.** Solve the following linear programming problem graphically:**CLO4,
BL3**Maximise $Z = 4x + y$

subject to the constraints:

$$x + y \leq 50$$

$$3x + y \leq 90$$

$$x \geq 0, y \geq 0$$

(9)

B. Find the minimum value of $w = 2x_1 + 10x_2 + 8x_3$ **CLO4,
BL3**

subject to the constraints

$$\left. \begin{aligned} x_1 + x_2 + x_3 &\geq 6 \\ x_2 + 2x_3 &\geq 8 \\ -x_1 + 2x_2 + 2x_3 &\geq 4 \end{aligned} \right\}$$

where $x_1 \geq 0, x_2 \geq 0$, and $x_3 \geq 0$.

(9)

Q-6. Answer the following.**[16]****A** Define the Central Limit Theorem.

(8)

**CLO3,
BL5**

The average performance across multiple exam slots becomes statistically stable and normally distributed, enabling fair score normalization and a single merit list even across different exam difficulties. (For instance, JEE). Justify the statement above. Use the data below to justify the statement above.

	Slo Avg	Std	Student
t	Score	Dev	Score
A	150	40	200
B	100	25	140

B What are momentum and adaptive gradient parameters in variants of the gradient descent algorithm? Discuss in detail the effect of these parameters on convergence. (8)

**CLO4,
BL5**
